PROJECTS

YKifech
09/2024 - 12/2024

YKifech is a smart social discovery app that helps users find the perfect place to go out with friends or family based on their current mood or needs, with a focus on user-friendly interfaces. It features a mobile version built using Expo, a popular framework for React Native applications, which allows for easy deployment and cross-platform compatibility. The app includes a dashboard for administration and utilizes Next.js for its web components. This setup allows for dynamic management and updates, providing both backend and frontend functionality for users to manage their data or workflows effectively.

Eventy   02/2024 - 05/2024

Eventy is a B2B event management platform designed to streamline the planning, organization, and execution of business events. It provides tools for managing registrations, scheduling, attendee engagement, and post-event analytics, making it easier for businesses to create impactful and seamless event experiences. The platform emphasizes user-friendly interfaces, efficient workflows, and customization to cater to various event types and business needs.

Binomi   09/2023 - 12/2023

Binomi is part of a wider context of applications linked to the search for accommodation and roommate search. It is not intended to replace existing systems, but rather
an innovative addition to the overall housing search experience for students.
experience for students. As a stand-alone application, Binomi acts as a specialized tool
to facilitate the search, selection and cohabitation of shared accommodation.
shared accommodation. It integrates seamlessly with existing technologies, playing a valuable role in the
ecosystem of solutions for student accommodation.
technologies used : Flutter, NestJS

Dashify   01/2023 - 06/2023

Dashify is a no code dashboard builder that helps customers build there own dashboard with no development skills needed to visualise their business status with chart.
Technologies used : Angular, Spring boot, Flask

Nursini   01/2022 - 03/2022
